DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 28-30 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Uzoh in view of Chidambarrao of record for reasons of record.

Response to Arguments

Applicant's arguments filed 8/6/04 have been fully considered but they are not persuasive.

Applicants argue that the Uzoh patent while disclosing the average grain size of 0.5 micron does not disclose the grain size not less than 0.5 micrometers. The reference while teaching the average grain size of 0.5 microns further teaches as recited in the remarks, that "large grains are always preferably to small grains." Thus one having ordinary skill in the art would have been motivate to maintain the grain size at 0.5 micron or larger, since the reference further teaches that "larger grained damascene interconnects have higher reliability when all other factors are equal." (col. 4, lines 7-10).

Applicants further argue that the secondary reference does not disclose the claimed invention. Applicants argue that the relationship between the grain size and electrical resistance is not shown and is only shown by the present invention as recited in independent claim 28.

The Chidambarrao patent teaches that by selection of grain size and reducing void formation, electrical resistance may be controlled (see col. 4, lines 8-33).

Therefore, it would have been obvious to one having ordinary skill in the art to use larger grained interconnects, because the Uzoh patent teaches that such use produces higher reliability and the Chidambarrao patent teaches the control of electrical resistance by the selection of grain size to reduce void formation, i.e., if the grain size is large enough to extend from the top to the bottom or from one side to the other.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

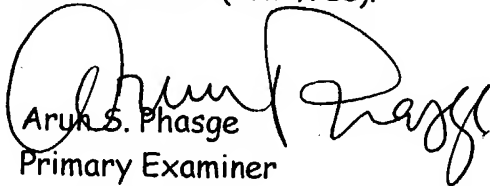

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
